

PARROT CK3100 LCD

Bluetooth® hands-free car kit

The Parrot CK3100 is a *Bluetooth* hands-free kit with an LCD screen. Not only does it display your phone's information (call records, network signal, etc.), but also your phonebook: the kit automatically synchronises all your contacts. Combined with built-in voice recognition and Parrot noise reduction, the Parrot CK3100 reproduces phone conversations over the vehicle's speakers in top quality and mutes the car stereo when you answer a call. The ideal in-car communication tool.

Advanced features

- LCD SCREEN : The CK3100 comes with a high-definition screen for displaying the contacts and information from the kit and the phone.
- PHONEBOOK SYNCHRONISATION : The kit automatically synchronises its phonebook with the contacts on your mobile phone.
- BUILT-IN VOICE RECOGNITION : The voice recognition feature is built into the CK3100 to guarantee maximum safety at the wheel.

Connections

Bluetooth v1.2

Bluetooth wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo profile (A2DP) uses the same radio frequencies and allows the sending of music files from one device to another. As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* stereo mobile phone (A2DP). Refer to www.parrot.com to know if your mobile phone is compatible.
